## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 line 5, calls for "at least one opening" and then "at least one openings". This is confusing.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-7, 11-15, 17-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Wo '238.

Wo '238 discloses a cutting tool (see Fig. 1) of a cutting machine having a base element and a chisel holder, wherein the chisel holder has a plug-in shoulder retained in a plug-in receptacle of the base element, the plug-in receptacle is spatially connected with its surroundings via at least one opening, and the at least one opening is at least partially closed by a sealing element (18), the cutting tool comprising the chisel holder having a stop resting against a second stop of the base element, the base element (20) having a

shoulder extending at an angle relative to the second stop, that a clearance (16) forming an adjusting space between the shoulder of the base element and a side of the chisel holder facing the shoulder, wherein the sealing element (18) is shaped to bridge the clearance.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8-10, 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wo '238 in view of either Wrulich et al. (US 4456306) or British document (GB 2055434).

Wo '238 discloses the invention substantially as claimed. However, Wo '238 is silent about including a wedge shaped sealing lip. Wrulich et al. and British document both teach a wedge shape sealing lip (5, 1 respectively). It would have been considered obvious to one of ordinary skill in the art to modify Wo '238 by substituting the seal as taught by either Wrulich et al. or British document '434 since such a modification reduce debris from entering into the bore of the base and thus limiting the life of the holder.
